PRACTICAL FEATURES OF THE USE OF DEBATES AND GAMING TECHNOLOGY IN THE CLASSROOM

Ganieva Xayriniso
Turgunboyeva Mohira

Abstract

This article covers these features that pupil, being based on the skills generated with the help of a debatable method, it is capable to apply and develop these skills in concrete situations of dialogue, carrying out socially significant roles and skill to assert the position in problem situations. In this article have been analyzed all these methods and the receptions raising quality of training to foreign language on the basis of studying of various techniques of teaching, used in work with children. Many of receptions can be applied with success at teaching children of younger and more advanced age.

Keywords: debate, group dialogue, activization, cognitive activity, intercultural dialogue, methodology, games, classroom activities, presentation.

Introduction

It allows forming also the conscious attitude to consideration of problems, activity in its discussion, speech culture, an orientation on revealing of the reasons of arising problems and installation on their decision further. Here the principle of formation of critical thinking in pupils is realized. Language, thus, is simultaneously both the purpose and means of teaching. The method of debates helps pupils not only to seize all four kinds of speech activity, but to means of a language situation on a background of a problem in social and cultural sphere to

find out the reasons of the arisen situations and to try even to solve them. Interest to the independent decision of a problem is the stimulus, driving force of process of knowledge, application of a method of discussion allows making active cognitive activity of pupils, their independence, forms culture of creative operative thinking, creates conditions for use of personal life experience and received before knowledge for mastering new.

Main body

As discussion and the decision of problems occurs during controlled group dialogue at participants skill to operate in interests of group is developed, there is an interested respect for interlocutors and conducts to formation of collective. Application of this method in aggregate with a method of projects will allow generating thinking and owning not only the English language, but also the expert understanding in various problems, capable to be guided in quickly varying information streams. Less interesting technique of activization of cognitive activity trained is the technique of role game which also can to reflect a principle of problematical character at its certain organization and allows solving problem situations of a various degree of complexity. It can be used as independently, and in a context of a method of projects, is especial as the specific form of protection of the project. Trained apply the experience of the saved up knowledge, results of research during work above the project in realization of socially significant roles growing on the importance with passage of a cycle of occupations. Such modeling of situations of professional - business intercultural dialogue helps pupil to get used to various situations of the future activity which he can face in a real life. Problematical character of role game is realized through modeling of situations in which this or that problem can find the certain decision. Being in a role, pupil solves problem situations, evidently showing in full communicative competence the practical decision of a problem. Certainly, such way of protection should be adequate to a researched problem. Selection by that and problems for use of this or that method - a separate research problem. Here it is important, that communicative competence was formed in real acts of intercourse in which the

English language is means of formation and a formulation of idea. Thus, pupil, being based on the skills generated with the help of a debatable method, it is capable to apply and develop these skills in concrete situations of dialogue, carrying out socially significant roles and skill to assert the position in problem situations.

Conclusion

Scholars suggest different steps and various successions in applying role play in teaching. Based on the empirical evidence, we suggest our step-by-step guide to making a successful role play. Also, the teacher should remember that each of the submitted methods works more effectively if they are combined and applied together at every lesson. It is impossible to allocate the best and most effective of them, every teacher himself chooses for himself what method approaches for each concrete case better.
